

## National Bee Count

The wild bee is not doing well. Of the 358 species, half are on the endangered species list. If we know more about bees, we are more able to help the bee. Therefore 'Nederland Zoemt' has organized a National Bee Count.

### Participate

What's buzzing in your back garden? Count along during the National Bee Count on 13 and 14 April. You can participate in 3 easy steps.

#### Step 1

Choose a sunny or at least dry half hour on April 13 or 14.

#### Step 2

Take a calm stroll once around your garden and record each species that you see and how many of each species.

Not sure? No worries! Choose: 'unknown'.

#### Step 3

Finished? Go to [nederlandzoemt.nl/bijentelling](http://nederlandzoemt.nl/bijentelling) and submit your results.

### Nederland Zoemt

Nederland Zoemt is a project by LandschappenNL, Naturalis, IVN Natuureducatie and Natuur & Milieu, made possible thanks to an extra contribution from the Nationale Postcode Loterij, with the aim of structurally increasing food supply and nesting ground for wild bees in The Netherlands.

The Bee Count is organized in collaboration with EIS Kenniscentrum Insecten en Waarneming.nl.
